The Highest Quality Custom Designed Heavy Duty Platform Equipment

WORK-RITE

COMMERCIAL GRADE EQUIPMENT

Buckeye Body and Equipment manufactures a full line of Heavy Duty Platform bodies, and offer the highest quality , commercial grade products.

All of our **WORK-RITE** series heavy duty platforms include The following standard features:

- All steel construction, with rectangular tube structural outer perimeter rails, with miter cut corners and fully box welded.
- Structural channel cross members on 12" centers.
- Structural channel long members, with 10ga. Oversized gussets on 24" spacing.
- Exterior 7ga. Steel formed stake pockets with 3/8"x2 1/2" banding rail the full length sides and rear.
- Heavy duty double-knee braced bulkhead with laser cut viewing window slots in a 10ga. Steel panel.
- Under-body individual I.D. marker light brackets and full rear apron with recessed body I.D. lights.
- Floor type options include: Smooth steel in 10ga., 7ga. or 1/4" Tread plate steel floors in 1/8" or 1/4" Apitong hardwood floor, finished and sealed.

All manufactured products are protected from corrosion by a first stage acid etch, descaling and surface preparation process. Then two coats of sealer is applied to all surfaces, and finally 3mil minimum of acrylic urethane top coating is applied and baked on. All tube products have an interior frame wax coating applied to further improve corrosion protection.
